The Inter Tribal Council of Arizona, Inc., is conducting a one-day roundtable for tribes on August 13, 1998 at the Quality Hotel and Resort, located at 3600 N. Second Avenue, Phoenix, Arizona.

The purpose of the roundtable is to provide tribes with information on the perchlorate contamination that has migrated from groundwater sources in Nevada and has been identified in drinking water, the Colorado River, and Central Arizona Project water. The roundtable will also provide tribes with an opportunity to interact directly with the federal and state agencies that are investigating the extent of the contamination and conducting research on the human health and ecological effects of this contaminate.

In addition, the roundtable will provide a mechanism to ensure that ongoing tribal participation is incorporated into the sampling, research, and information sharing processes.

Attached is the final agenda. Please contact Claire Miller, or Patrick McMullen at (602) 248-0071 if you have any questions.
